

Accident Detection & Notification

Organization Name: PSA

Overview:

We are looking for solutions that make mobility safer in India. The solution can be a device on/in the vehicle but also a software that helps to mitigate circulation risks.

Current challenges:

India has one of the highest rates in terms of road accidents.

The solution provider might propose innovation on vehicles that strengthens results on crash tests. She/He also might propose solution to avoid collisions (alerts, sensors) or services that warn competent persons in case of emergency/accident.
